ABSTRACT OF THE DISCLOSURE

A writing instrument with a USB storage includes a cap having a flash memory installed in the cap. A USB plug is formed at a lower end of the cap and electrically connected with the flash memory. A barrel has a chamber defined at an upper end thereof. The USB plug of the cap is inserted in the chamber. A plastic writing tip is formed at a lower end of the barrel. A clip is formed at an outer periphery of the cap. Whereby, the writing instrument can be used for actuating a monitor of a PDA and exchanging data with the PDA or a computer.
